Photoshop Installation Instructions for iCorrect 32/64 bit Plug-ins: Portrait 2.0, and EditLab Pro 6.0. (Macintosh 32/64 bit versions) (Photoshop CS4, CS5, CS6, & CC). (Note: Instruction screenshots and file folder names will reference iCorrect EditLab Prot but also apply to iCorrect Portrait 2.0)

- 1. Unzip the iCorrect EditLab Pro 6.0 zip file
- 2. Look at the unzipped files. The User Guide may be viewed by opening the file named *EditLab60UserGuide.html* with a web browser. The plug-in file *iCorrect EditLab Pro 6.0 plugin* must be copied into an application's Plug-Ins/Filters folder, as described in step 3. Note: Photoshop CS6 and CC Mac versions are available only in 64 bit so only install the iCorrect EditLab Pro 64 bit plug-in.

3. The *iCorrect EditLab Pro 6.0 plugin* plug-in file must be copied into the *Plug-Ins/Filters* folder of Photoshop. *Note: Photoshop CS6 & CC do not have a Filters sub-folder so install the 64 bit .8bf file in the Plug-ins Folder.*
